After that the Chairman requested all the shareholders to read the voting and vote counting procedures to be followed as below:

Shareholders have the right to vote according to the number of shares held, wherein one share is equal to one vote. For each agenda item, each shareholder was eligible to cast his/her vote, to either approve, disapprove or abstain from voting. No split voting was allowed. Exceptions were made for proxy holders for foreign investors who appoint custodians in Thailand to keep their clients' securities. The Barcode system was used in the shareholder registration and the vote counting process. In the vote counting process for every agenda item, shareholders who wished to disagree or abstain from voting on any agenda should indicate their votes on the ballot and submit them to the Company's officers for vote counting. Shareholders who did not cast votes on the ballots would be assumed to have approved the agenda as proposed, and the votes would be counted according to the number of shares they hold. Shareholders who approve the agenda were not required to cast votes on the ballot. To count the vote approving an agenda, the Company would deduct the total votes cast in disagreement and abstentions, as well as the number of invalid ballots, from the total votes of shareholders in attendance at the Meeting.

However for agenda 5 (re-election of directors), the Company collected all ballots from all the shareholders present in the meeting. The votes required for each agenda item are indicated in the Notice of the AGM.

Shareholders, who had entrusted their proxies to Independent Directors to attend the Meeting and cast their votes on their behalf, would have their votes cast according to their wishes. The result of voting for each agenda item will be announced and shown on the screen.

If any shareholder or proxy would like to give his or her opinion or ask questions, they are requested to raise their hand. Upon receiving the Chairman's permission, they are requested to state their name and then proceed. If their opinion or question is not relevant to that particular agenda item, shareholders and proxies are requested to express their views after the completion of all enlisted agenda items.

All our business segments of PET, Polyester fibers & yarns and PTA reported positive earnings and were able to meet our return expectations.

The IVL business model of global operations, scale and integration continues to deliver strong growth in revenues and earnings. The depth of our integration allows us to capture margins in the polyester value chain and our scale provides for a competitive cost structure. Agenda 9 **Other business**

- None -

The Chairman invited shareholders to express their opinions or asked questions regarding the business operation of the Company.

A shareholder requested the Company to hold the Annual General Meeting of Shareholders in mid of April.

Mr. Rathian Srimongkol informed the shareholder that he would ask management to consider the proposal.

A shareholder asked about the business outlook in the future.

Mr. Alope Lohia presented the business outlook of 2011 as follows:

Positive outlook for Polyester Value Chain supported by strong demand and expanding integrated margins of our end products- PET, PTA and Polyester fibers & yarns. PTA demand is equally very strong and compliment to integration model of IVL. The sharp increase in Cotton prices to historical highs has resulted in shift of demand towards Polyester Fiber and Yarns creating scarcity for PTA which is one of the major raw materials for polyester fibers and yarns.

Further, the strong demand globally is supported by turnaround of the economy in North America after the 2008 crisis and is now seeing strong demand growth. The Polyester value chain has been able to pass through the increase in prices and expand integrated margins. Polyester fibers and yarns has been taking market share which has increased from 39% in year 2000 to 51% in year 2010E of all fibers. Polyester growth over other fibers is from more stable and sufficient supply as not dependent on weather related production impact, more functional as better stretch, durability and less water absorbency and its lower cost. Cotton is a natural fiber and its supply is dependent on weather conditions as well as on competing cash crops and Bio-fuel demand, due to limited supply of land. The proximity of Polyester Value Chain to consumer necessity has resulted in continuous positive growth in demand whether it is PET or polyester fibers and yarns. PTA is tight on strong demand from Polyester and PET and spreads are expected to remain firm.

2011 is expected to see the fast pace of IVL in delivery of both performance and size growth. The AlphaPet plant is fully operational and has demonstrated its full nameplate capacity of 1200tpd in November and is expected to ramp-up to full capacity in the first half of next year. The first full year impact of volume from AlphaPet will be in year 2011.

In addition, IVL has been able to turnaround the integrated PTA – PET plant in Italy to positive earnings in 4Q 2010, shortly after completed the joint venture investment in July, 2010. IVL has completed the acquisition of PET plant in China at the end of January, 2011 and in early March, 2011 completed the acquisitions of Invista PET and Polyester plants in US and Mexico, the SK PET and Polyester plants in Indonesia and Poland. Acquisition of Trevira announced in Q1, 2001 is expected to be closed within the second quarter of year 2011.

These will add the installed capacity by 2.1 million tonnes to the IVL current installed capacity of 3.6 million tonnes (excluding joint venture plants in Italy). At the same time, we are setting-up a greenfield PET plant in Nigeria, brownfield expansion at existing site in Rotterdam, Netherlands and expansion of Polyester fibers in Indonesia.

On completion of the above stated acquisitions and expansions, IVL will have an increasingly advantaged portfolio and its capacity will increase by 2.1 million tons. IVL will have the leading market position in Thailand, North America and Europe. The regional capacity distribution of IVL will be Thailand 28%, North America 30%, Europe 30% and Emerging Markets 12%.

The management continues to look at various growth options in all parts of the world, especially in Asia and Middle East & Africa, in line with its "Aspiration 2014" plan. Aspiration 2014 looks at sustainable growth driven both by volume and expanding margins through value addition to add specialty products in PET and Polyester fibers & yarns through acquisition of Invista and Trevira respectively.

A shareholder asked that Pepsi has announced that it will be using bio-plastic; will that have any impact on the Company.

Mr. Alope Lohia informed that use of Bio-plastics will be an opportunity for growth. IVL is studying feasibility of Bio-plastic products with regard to which we had made an announcement.

A shareholder asked whether the Company is a monopoly business or not and whether there was a Directors' Liabilities Insurance (D&O).

Mr. Rathian Srimongkol replied that the Company was not monopoly business. The Company had market share in America 30%, Europe 30%, Thailand 28% and Emerging Markets 12%. The Company has Directors' Liabilities Insurance in place for all its Directors and Officers.

A shareholder asked about the ranking of the Company and if the economy slow down, what would be the growth rate of the Company.

Mr. Rathian Srimongkol replied that the Company is now the number one in PET production. Moreover, if the economy slow down, there will be minimal impact because our products are used in the daily products of consumers whose demand is unlikely to be affected in an economic slowdown.

A shareholder asked about the business outlook in the next 3-5 years.

Mr. Rathian Srimongkol answered that the capacity will be increased from now 3.6 million tons to 10 million tons in 2014.

At the end of the Meeting, there were 374 shareholders present in person and 956 shareholders present by proxy. Therefore, there were a total of 1,330 shareholders present, holding an aggregate of 4,218,062,681 shares, representing 87.62 percent of total shares sold.
